DETAILED ACTION

Claim Rejections - 35 USC § 103

1. Claims 7-9 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones 4,580,626 in view Owens III 4,441,742. Jones shows a riser control device, particularly designed to be used in connection with spool or horizontal production trees for wells in sub-sea oil and gas installations, where within a housing (32) provided in opposed direction radially movable pair of rams (26, figure 1) for isolating the well and simultaneously, in opposed direction radially movable pair of shear blades (34) for cutting off an intervention string, the rams and blades being driven by means of a within the housing (32) with horizontal actuation, but does not show vertical actuation. Owens shows a similar riser control device having a pair of rams vertically actuatable to isolate the well (figures 1-2) where the actuator is hydraulically driven and annular piston and chamber device (claim 8; 43), which via piston rods (45) and translation beams 26/54/40 transforms the movement of the piston to open or close the rams whereby the radial movement of the shear blades implies radial movement of the rams (claims 9, 15 & 6). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Jones, as taught by Owens, to include vertical actuation to improve the (col. 2, lines 25-38) force applied to the cutting blades improving the cutting properties of the apparatus.

Allowable Subject Matter

2. Claims 10-14 and 16-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

3. Applicant's arguments filed 06/02/05 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the housing being inside/within the riser) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
